

## **This is our report of Egypt Ostomy Association.**

Dear EOA

Our country has political, economical problems as you all know, also our place in cancer institute (Fom Elkhaliq, = address in Cairo) since a long time they renovate it, since the revolution delays it, so we are not working in full capacity, but with all these circumstances we distribute the flanges, bags to the needy ostomates 4 flanges, 4 bags per month, we know that this is not enough but to distribute 2 more people we have to restrict the amount.

Also I contact health insurance authority who is responsible of giving the medications in ministry of health to distribute the bags, flanges through it, they did. But they may distribute any brand they have.

Also we trained persons 2 train the new ostomates but they are not enough

Also we have donations from relatives of ostomates died, or not in need, this help us a lot.

We haven't budget to make meetings to aware people about our activities. We prefer to have flanges, bags for ostomates.

We make personal awareness to the people about our association, its activities.

Naguib Elnikhaily.
